About Company

Re-Leaf is a brand under ICF group of companies established in the year 1991. Re-Leaf focuses in the design, development manufacturing & services of innovative infrastructures for portable sanitization, infrastructure & environmental management sectors.

Our Mission

Our focus is on bringing in innovative solutions to transform public health and hygiene across the world, with a wider impetus on sustainable sanitation infrastructures.

Our Vision

We understand society's evolving needs and are committed to designing, manufacturing, installing, and maintaining sustainable, innovative products that transform public health, hygiene, environmental care, and improve lives within communities.

Our Values

- Our clients' success defines ours; we grow together.
- Our people are our power, and we invest in their growth.
- We keep our word and do business with integrity.
- We embrace change and innovate to stay ahead.

Portable Toilets

Smart Sanitation for Every Outdoor Need

Re-leaf portable toilets are built with high-quality polyethylene, ensuring durability, hygiene, and comfort wherever sanitation is required. From construction sites to outdoor events, our units offer a clean, reliable alternative to conventional restrooms, ensuring user comfort and environmental care.

Why Choose Our Portable Toilets?

- Hygienic & Odor-Free: Clean, fresh, and user-friendly.
- Built to Last: Sturdy, weather-resistant construction.
- Easy Setup: Quick to transport and install anywhere.
- Certified Assurance: ISO-inspected for trusted quality.

How It Works

Portable toilets collect waste in a sealed tank beneath the seat, with chemicals aiding in waste breakdown and odor control. Units can be emptied using service trucks with suction equipment, followed by refilling chemicals and water for continued hygiene.

Services We Offer

Sales & Rentals: Available for both short-term events & long-term site use.

Delivery & Setup: Easy transportation & installation by our trained team.

Maintenance & Cleaning: Includes suction cleaning, refilling chemicals, dismantling, and transport services.

Specifications

Specifications	Details
Dimensions	1100mm (W) x 1100mm (D) x 2340mm (H)
Weight	80 kg
Material	Polyethylene
Options	Mains Connected Type: Connects to external treatment tanks, compatible with Indian/Western toilets, urinals, shower cabins. Chemical Toilets: Built-in tanks for standalone use, available in Indian and Western styles.

Where You Can Use Portable Toilets

- ★ Construction sites
- ★ Festivals and fairs
- ★ Disaster relief camps
- ★ Outdoor weddings and gatherings

Premium Portable Toilets

Premium portable toilets with IWC, EWC, and shower options for comfort and hygiene anywhere. Ideal for sites and events, ensuring clean and convenient sanitation solutions.

Bio Septic Tanks

Re-Leaf's bio septic tanks offer efficient, eco-friendly sewage management while meeting regulatory standards. Available in 1000L, 5000L, and 10000L capacities, they suit toilets and setups for up to 100 users. Manufactured in ISO-certified facilities under DRDO guidelines, our tanks ensure durability, hygiene, and environmental safety, providing reliable sanitation with flexible options for diverse needs.

Why Choose Bio Septic Tanks?

Eco-friendly and cost-effective, saving water, reducing bills, and generating biogas. Hassle-free, durable design with no manual cleaning and water reuse.

Pricing

Starts at ₹25,000, making sustainable waste management accessible for all.

Product Range

Series	Model	Capacity (Flushes/Day)
Ultra-Series	Ultra-Series I A	25 flushes/day
	Ultra-Series I S	33 flushes/day
	Ultra-Series II	50 flushes/day
	Ultra-Series III	75 flushes/day
Prime Series	Model B 3000	140 flushes/day
	Model B 5000	230 flushes/day
	Model B 10000	475 flushes/day
	Model B 20000	950 flushes/day

Salient Features

- ★ Speeds up waste digestion 10x faster than normal septic tanks.
- ★ Decomposes waste in 3-4 days instead of 40 days.
- ★ Lowers greenhouse gas emissions with no methanogens.
- ★ Works across a wide temperature range.
- ★ Achieves 95% organic sludge breakdown within 72 hours.
- ★ Reduces contamination in discharge water.
- ★ No frequent emptying required under normal use.
- ★ Scalable, sustainable, and allows water reuse.
- ★ Durable, sturdy, and easy to maintain.
- ★ Made from 100% virgin material for long life and recyclability.

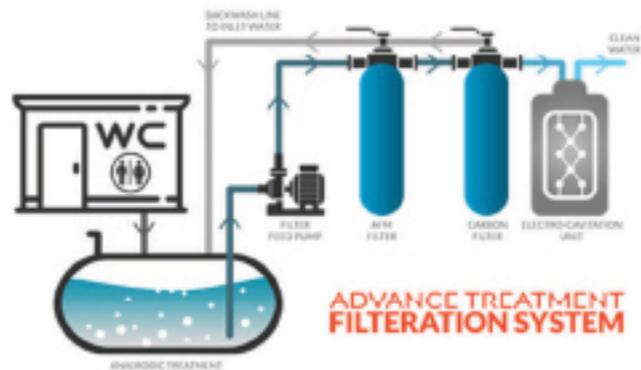

Technology approved & Recommended by Ministry of Jal Shakti, Government of India.

Decentralized STP Solutions

Sustainable, Scalable, Smart

ReLeaf specializes in Decentralized Sewage Treatment Plants (STPs) designed for small to medium-scale setups such as residential complexes, villas, bungalows, townships, and resorts. Our solutions are compact, eco-friendly, and easy to integrate with both new and existing infrastructures.

Our Key Offerings

Nutri Zorb Decentralized STP Technology

- Cyclic Anaerobic-Aerobic treatment for nitrogen removal
- Uses PP media to convert waste into harmless gas & water
- Flexible installation: above/underground, driveways, basements, parks

Retrofit STP Solutions

- Upgrade underperforming STPs to meet compliance
- Integrates seamlessly with existing systems

Bio Ultra & Sewage CARE Aerobic Cultures

- Boost treatment efficiency, reduce sludge
- Break down organics without harmful byproducts

Why Choose ReLeaf?

Efficient & Compact:

Ideal for space-constrained areas; low footprint.

Scalable & Customizable:

Tailored for villas to villages; grows with your needs.

Eco-Conscious:

Enables Treat at Site, Reuse at Site* approach for non-potable use.

Regulatory Compliance:

Ensures discharge meets environmental norms.

Hassle-Free:

Easy installation, operation, and maintenance.

The Problem with Traditional STPs

Overloading reduces treatment efficiency.

Complex operations and high sludge output.

Poor results in BOD, COD, and nutrient removal.

A Cleaner Tomorrow

With ReLeaf's advanced STP systems and bio-cultures, communities can efficiently treat wastewater on-site, reduce environmental impact, and promote responsible water reuse — all while saving space, time, and resources.

Containerized Infrastructure Solution

Re-Leaf delivers turnkey container solutions for all your infrastructure needs, whether for offices, stores, restrooms, or worker housing. We specialize in customized, containerized setups using both upcycled shipping containers and newly fabricated units to match your requirements seamlessly.

Our modular container solutions are ideal for rapid deployment, ensuring your infrastructure is up & running in record time with minimal site disruption.

We offer these solutions for long-term lease or purchase, ensuring you have the flexibility, convenience, and reliability needed for your business operations.

Our container infrastructure is:

- ★ **Scalable**
Easily expand or relocate based on your evolving needs.
- ★ **Sustainable**
Utilizing upcycled containers reduces carbon footprint.
- ★ **Cost-Effective**
Saves construction time and project costs.
- ★ **Customizable**
Interiors and exteriors tailored to your specific requirements.

Future-Ready Infrastructure

By choosing Re-Leaf, you invest in future-ready infrastructure that can adapt with your growth. Whether expanding your office, setting up retail kiosks, or providing housing for project staff, our containerized solutions bring unmatched convenience and speed.

- ★ Corporate and project site offices
- ★ Worker housing accommodations
- ★ Portable retail spaces and kiosks
- ★ Emergency shelters and clinics
- ★ Educational and training spaces
